Preface

The Job Accommodation Network (JAN) is funded by a grant from the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office <https://www.loc.gov/copyright>. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 09/12/2022.

JAN'S Accommodation and Compliance Series

Introduction

JAN's Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN's Searchable Online Accommodation Resource (SOAR) at <https://AskJAN.org/soar>.

Information about Renal/Kidney Disease

Kidney diseases are diseases of the kidney substance that alter the structure and function of the kidney. There are many diseases of the kidneys such as glomerulonephritis, pyelonephritis, polycystic kidney, and lupus nephritis. The treatment and potential for recovery depends on the type of disease. Kidney diseases can lead to kidney failure.

When an individual has mild kidney failure, dialysis or renal transplant is not required. However, the individual may need to take certain medications and abide by dietary restrictions. Dialysis is needed when the body alone can no longer remove enough waste products to sustain life. There are two forms of dialysis: hemodialysis and peritoneal dialysis. Hemodialysis is a process where excess waste products and water are removed from the patient's blood, which is drawn through a special created vein in the forearm, into a dialysis solution. Hemodialysis requires the use of a machine and one dialysis session takes about four hours to complete, usually three times a week. Peritoneal dialysis is performed by introducing dialysis solution into the peritoneal (abdominal) cavity through a catheter. Waste products and excess water from the body are passed through a natural membrane lining of the peritoneal cavity, and the solution can be drained out of the abdomen into a bag and be thrown away. Peritoneal dialysis usually involves four exchanges per day. Accommodations for individuals with kidney disease differ dramatically from one person to another.

Renal/Kidney Disease and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see [How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act \(ADAAA\)](#).

Accommodating Employees with Renal/Kidney Disease

People with limitations from renal/kidney disease may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people who are aging will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee's job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
6. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Decreased Stamina/Fatigue

- Accessories for Scooters
- Aide/Assistant/Attendant
- All-Terrain Scooters

- Anti-fatigue Matting
- Elevating Wheelchairs
- Ergonomic and Pneumatic Tools
- Ergonomic Assessments
- Ergonomic Equipment
- Examination and Procedures Chair
- Flexible Schedule
- Head Support for Wheelchairs
- Job Restructuring
- Low Task Chair
- Mechanic's Seats and Creepers
- Multi-Purpose Carts
- Periodic Rest Breaks
- Scooters
- Stand-lean Stools
- Stools for Cutting Hair
- Telework, Work from Home, Working Remotely
- Walkers
- Wearable Anti-fatigue Matting
- Wheelchair Accessible Scales
- Wheelchair Mounts
- Wheelchairs
- Worksite Redesign / Modified Workspace

Dizziness

- Alerting Devices
- Alternative Lighting
- Fall Protection
- Flexible Schedule
- Modified Break Schedule
- Padded Edging
- Personal Safety and Fall Alert Devices

- Protective Eyewear
- Rollators and Rolling Walkers
- Scooters
- Telework, Work from Home, Working Remotely
- Vehicle Rear Vision System

Nausea

- Flexible Schedule
- Mini Refrigerators/ Electric Coolers
- Odor Control
- Telework, Work from Home, Working Remotely

Pain

- Industrial
 - Adjustable Workstations for Industrial Settings
 - Anti-fatigue Matting
 - Anti-vibration Gloves
 - Anti-vibration Seats
 - Anti-vibration Tool Wraps
 - Carts
 - Compact Material Handling
 - Wearable Anti-fatigue Matting
- Office
 - Adjustable Workstations for Office Settings
 - Alternative Keyboards
 - Alternative Mice
 - Chairs with Head Support
 - Ergonomic and Adjustable Office Chairs
 - Ergonomic Assessments
 - Ergonomic Equipment
 - Forearm Supports
 - Gooseneck and Other Telephone Holders

- Scribe/Notetaker
- Speech Recognition Software
- Supine Workstations
- Writing Aids
- Other
 - Aide/Assistant/Attendant
 - Automatic Door Openers
 - Flexible Schedule
 - Modified Break Schedule
 - Scooters
 - Service Animal
 - Stand-lean Stools
 - Telework, Work from Home, Working Remotely
 - Worksite Redesign / Modified Workspace
 - Workstation Space Heaters

Work-Related Functions

Commute

- Flexible Schedule
- Ridesharing/Carpooling
- Telework, Work from Home, Working Remotely
- Transportation Assistance
- Van Conversion
- Walkers

Policies

- Additional Training Time / Training Refreshers
- Aide/Assistant/Attendant
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Marginal Functions

- Modified Break Schedule
- Periodic Rest Breaks
- Physical/Social Distancing Signage
- Policy Modification
- Reassignment
- Service Animal
- Sleep Alerting Devices
- Strobe Lights
- Supervisory Methods
- Support Animal
- Telework, Work from Home, Working Remotely
- Touchless Faucets

Situations and Solutions:

A retail sales associate with diabetes developed complications that affected the functioning of her kidneys.

She required hemodialysis three times a week. Hemodialysis requires adhering to a fixed schedule. The employee requested a transfer to a store closer to the dialysis center as an accommodation under the ADA, and applied leave under the FMLA, when needed, to receive dialysis.

A financial advisor had renal failure which required dialysis treatment three times a week.

The employer granted a modified schedule so the employee could work around his medical appointments. The employee was able to work before and after dialysis, so work goals were still achieved.

A cashier at a large retailer had kidney disease.

The company had a no food or drink policy, which prohibited employees from having food or drink on the sales floor. The employee had dietary needs that required him to drink during his shift. The employer modified its policy and permitted the employee to drink at his workstation. This enabled the employee to continue working while maintaining his health.

A tax preparer with renal disease had trouble getting to work on time due to toileting needs.

They requested and was permitted telework to eliminate the need to commute daily. This enabled the employee to meet his toileting needs, but also perform the job effectively.

An employment counselor had a kidney stone, which required monitoring from a healthcare provider.

The employer granted ADA leave as an accommodation so the employee could seek medical treatment. Once recovered, the employee was able to return to work full duty.

A warehouse worker returned to work following a kidney transplant.

The employee had lifting restrictions and follow up medical appointments. The employer explored lifting devices on JAN's website, which they then provided along with leave time for the medical appointments. This enabled the company to retain a valued employee.

Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at <https://AskJAN.org/soar> is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you

have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
